

# ZMORPH 2.0 SX FULL SET

**ZMorph 2.0 SX Full Set** is a complete desktop solution for multi-material digital fabrication. This set enables you to utilize the full potential of interchangeable toolheads with **1.75 mm Plastic Extruder, DUAL PRO Plastic Extruder, CNC PRO milling toolhead, Laser toolhead, and Thick Pastes Extruder** included in the package. Combined with proprietary **Voxelizer software** it's a true mini-factory that fits on your desk.

## Unique features of ZMorph 2.0 SX:

- Encoder-based Closed Loop System that ensures high quality of prints and CNC projects even at high working speeds and strong torques.
- Interchangeable toolheads, enabling you to change fabrication techniques in just a few easy steps.
- Magnetically attached dedicated worktables for 3D printing and CNC milling.
- Magnetic covers to protect your prints and make them easily accessible at the same time.
- New expansion slot for attaching accessories, like cooling fans and Touch Probe (included in all sets).
- New aluminum spool holder for up to four spools of filament.
- New LCD touchscreen to navigate the intuitive user interface.

**5** TOOLHEADS
